

" 5G ecosystem – use-cases, testing and validation"

Organizer: Ass.Prof Razvan Craciunescu, University “Politehnica” of Bucharest

Chairs: Ass.Prof Razvan CRACIUNESCU and prof.dr.eng. Florin ALEXA – Department of Communications, Politehnica University Timisoara

Description: 5G is one of the hot topics nowadays as every major stakeholder is trying to get the most out from this new technology. Interested Big Tech Companies, Universities or SMEs are developing solutions for the 5G network, solutions that will be tested and validated to be deployed to the public. This Special Session is focused on papers that will present applications or use-cases that were researched and developed or that can present relevant challenges that were observed during the use-cases development. Also, in scope of the session are papers that can present findings from conducting testing scenarios or from the implementation of validation procedures for 5G applications or 5G off-the-shelf/custom devices.
